ULTRA-HIGH PERFORMANCE CONCRETE UHPC

Ernst W. & Sohn Verlag Sep 2014, 2014. Taschenbuch. Book Condition: Neu. 605x425x15 mm. Neuware - Dieses Nachschlagewerk gibt einen umfassenden Überblick, von den Materialeigenschaften über die Herstellung bis hin zu Aspekten des Entwurfs und der Bemessung, und präsentiert ausgeführte Beispiele für Brücken, Stützen, Fassadenelemente und Dachelemente. Aus Beton-Kalender 2013. Seit 1906 begleitet der Verlag Ernst & Sohn mit dem Beton-Kalender die Entwicklung des Stahlbeton- und Spannbetonbaus. Dieses Buch sollte das Fortschreiten des Eisenbetonbaus jährlich begleiten, und zwar so lange, bis die 'stürmische Entwicklung', so der erste Herausgeber Fritz von Emperger (1862-1942), der Bauweise ein Ende gefunden hätte. Ausgewählte Kapitel des Beton-Kalender werden in der neuen englischsprachigen Reihe BetonKalender Series dem internationalen Markt zur Verfügung gestellt. Selected chapters from the German concrete yearbook are now being published in the new English 'Beton-Kalender Series' for the benefit of an international audience. Since it was founded in 1906, the Ernst & Sohn 'Beton-Kalender' has been supporting developments in reinforced and prestressed concrete. The aim was to publish a yearbook to reflect progress in 'ferro-concrete' structures until - as the book's first editor, Fritz von Emperger (1862-1942), expressed it - the 'tempestuous development' in this form of construction came to an end. However, the 'Beton-Kalender' quickly became the chosen work of reference for civil and structural engineers, and apart from the years 1945-1950 has been published annually ever since. Ultra high performance concrete (UHPC) is a milestone in concrete technology and application. It permits the construction of both more slender and more durable concrete structures with a prolonged service life and thus improved sustainability. This book is a comprehensive overview of UHPC - from the principles behind its production and its mechanical properties to design and detailing aspects. The focus is on the material behaviour of steel fibre-reinforced UHPC. Numerical modelling and...
