Many people would love to invest in shares as a way of boosting their retirement income; saving for a future dream project; creating a passive second income; retiring early from the rat-race or just making better use of their spare cash. But learning to invest in shares can feel like a daunting task and beginners are put off from doing so by all the financial jargon and complexity of the financial world. What they need most is a simple step-by-step guide, written in every day language, which concentrates on what they need to know at each stage and cuts through all that unnecessary noise. This book has been put together by Adrian Botham, a private investor with more than 27 years of experience investing in shares - someone who started with no knowledge in the subject whatsoever. Someone just like you maybe? Intended as an introduction to investing in shares, the book covers all the things you need to consider up front before investing any of your hard-earned cash in shares. It provides you with practical guidance to help you make some key decisions and start out safely on your own journey to becoming a successful share investor ensuring that, when you do buy your first shares, you get to keep more of the profits for yourself.
