Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from British Butterflies, Moths and Beetles Entomology, or Science of Insects, concerns a great number of living creatures, some of which we see around us every day of our lives. They are far more numerous than any other group of animals, for about 12,000 different kinds are known to inhabit England, although the smaller and less attractive groups are very insufficiently known at present; and at least twenty times this number are known to be found in other parts of the world. But in order to obtain a general knowledge of British insects, it is by no means necessary to make yourself acquainted with every one of these 12,000 species; for they have been divided into sections, so that each individual species can be identified and its resemblances to those most like itself perceived, and its differences pointed out. When you have acquired a general idea of the various sections of insects, you can then select the group which you like best, and confine your attention to it; but most people, when they begin to collect insects, collect everything which comes in their way, until they have formed this special preference. Naturalists have begun by dividing the various objects which we see around us into the Animal, Vegetable, and Mineral Kingdoms. The Animal Kingdom is again divided into several large sections called Sub-Kingdoms, to one of which, called variously Arthropoda, Annulosa, or Articulata, insects belong. The Arthropoda have no internal framework of bones, like vertebrate animals, but their bodies and limbs are formed of a number of jointed pieces, of a bony or horny consistence, to which the muscles are attached on the inside. This outer...
