Reviews

Great electronic book and useful one. It can be written in straightforward terms rather than difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Times Group Books, New Delhi, India, 2010. Hardcover. Book Condition: New. Dust Jacket Condition: New. First Edition. In the end, we are all products of the roads we travel. In the case of Stephen Roach, it's been the global road. He has criss-crossed the world as Morgan Stanley's first global economist, and most recently his journeys have increasingly led to Asia, at first because of events, but ultimately as a reflection of the allure and intrigue of this incredibly dynamic region for global investors. The global macro call--both for economies and financial markets -- became increasingly dependent on Asia. And getting Asia right has become Roach's personal obsession. This book represents more than 50 of Roach's key research papers, not just on Asia, but also how the region fits into the broad global context of the globalization of investing and financial markets around the world. Printed Pages: 432.
