Thorough manual for pdf lovers. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.

The project is of fundamental importance, and is to be continued under the new Council. The purpose of this cooperation is to hasten the acquisition of definite knowledge regarding the salt requirements of a few representative agricultural plants, and it is hoped thus to accomplish in a small number of years what would usually require many decades. Experimenters are earnestly requested to further this work in every way possible, and it is hoped that at least part of the time of one research worker in each laboratory where this kind of work is carried on may be devoted to this project. If all of the time of one or more persons can be devoted to the work, of course, that would be still better for the progress of knowledge in this field. The need for some well-established, correlated, quantitative knowledge of the salt nutrition of plants is clearly appreciated by all students of this important subject, as is also the present almost total lack of such knowledge. Our theories are incomplete and vague, and the experimentation on which they rest has not generally been such as to allow correlation between the different pieces of work.- It is planned that the present cooperation by a large number of experimenters will...
