

The Great Creation Debate (Paperback)

By Brad Freckleton

Xulon Press, United States, 2012. Paperback. Book Condition: New. 277 x 213 mm. Language: English . Brand New Book ***** Print on Demand *****.Why isn't the evolution of flight shown in the fossil record? Bugs, birds, bats and dinosaurs flew and are shown fully formed in the fossil record, but there are no animals with halfway wings in the fossil record leading from ground based animals to flying animals. What is desperately wrong with the Grand Canyon if evolution is true? Where are the massive signs of erosion between the sedimentary layers of the Grand Canyon if they were laid down a million years at a time? Why does massive erosion only show up at the top? Animals with well-developed eyes show up suddenly in the fossil record as do flying animals. It's the norm for plants and animals to show up in the fossil record with the same separations as we see in different types of living animals and plants today. The second law of thermodynamics is a law of science that says everything left to its own will wear out, run down. It is a fundamental law of science. So how did evolution accidentally go up?...

Reviews

Great electronic book and useful one. It can be written in straightforward terms rather than difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Kian Harber**

It is one of the most popular publications. It really is filled with knowledge and wisdom. It has been designed in an exceedingly straightforward way and it is merely soon after I finished reading this pdf by which it actually transformed me, affecting the way in my opinion.
