

Principia Nova Astronomica

By Henry Pratt

General Books LLC. Paperback. Book Condition: New. This item is printed on demand. Paperback. 60 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: . . . PARADOX VII. Concerning inertia considered as a tendency. The hypothesis that inertia has no direct character of its own, but is simply a tendency of the inert body to remain in the state, whether of rest or motion, in which it may happen to be. Motion is the result of an impulse imparted to its subject. There can be no motion where there is nothing to be moved. This impulse, from whatever source imparted, overcomes the inherent gravity of the mass it is setting in motion. In overcoming the inherent gravity it converts it temporarily into momentum. This momentum, inverting the previous relations of gravity, progressively increases the velocity of the imparted motion up to a certain point, when, if the original impulse be not sustained or renewed, the inherent gravity of the mass, reasserting itself as a tendency to rest, gradually brings the...
