In the nature of the case, within the frame of reference of action, such a conceptual scheme must focus on the delineation of the system of institutionalized roles and the motivational processes organized about them. Because of this focus and the very elementary treatment of processes of economic exchange and of the organization of political power, the book should be regarded as a statement of general sociological theory, since this is here interpreted to be that part of the theory of the social system which is centered on the phenomena of the institutionalization of patterns of value-orientation in roles. Henderson on the extreme importance of the concept of system in scientific theory, and his clear realization that the attempt to delineate the social system as a system was the most important contribution of Pareto s great work. This book therefore is an attempt to carry out Pareto s intention, using an approach, the structural-functional level of analysis, which is quite different from that of Pareto, and, of course, taking advantage of the very considerable advances in our knowledge at many points, which have accumulated in the generation since Pareto wrote.
