As the magnets are stationary, when the rear wheels are driven these are fastened on the axle, and in the case of a front wheel drive are secured to a hollow stub axle turning on steering pivots. In this connection the design of the steering forms a very important feature, for the center upon which each steering wheel turns is situated directly over the point of contact which that wheel makes with the ground. Consequently, if the circuit in one of the motors becomes broken by accident, the other motor is unable to develop a dangerously rotative momentum of force which might overcome the effort of the driver on the steering wheel, and thus deflect the steering and cause disaster. The wiring arrangements afford series or parallel control at the controller, and here five speeds forward are obtainable, besides three reverse speeds, one stop position, and three more positions for electric braking. A company has been organized in Freeport, 11l. , to operate motor cabs. The Pittsburg Motor Truck Company, recently organized with capital of 100, 000, will produce its machines in Koppel, N. Y. The Nassau Transportation Company will operate six motor buses between Mineola and Long Beach, N. Y. The Plainview-Lubbock motor bus line has been sold to Tavior. Hatch and Rosser of Lubbock, Tex. The meters of all motor cabs in Washington have been tested and tagged by the official sealer of weights and measures. The title of the...
